

INSTALLATION INSTRUCTIONS

For furniture power distribution units, Pull-Up (PU) series
(electrical rating: AC 125V/60Hz, 15A, see product label for details)

Suitable for installation in a kitchen or bathroom counter top surface with following prerequisites:

DANGER: Risk of electric shock, unit shall be connected to a GFCI receptacle or a GFCI branch circuit

CAUTION: To prevent the risk of fire and electric shock, please be sure to read all instructions before installing or use this unit. For unit with surge protection, do not install this device if there is less than 30 feet of wire between the electrical outlet and the electrical service panel.

WARNING – To reduce the risk of fire, electric shock, or injury to persons:

1. Indoor use only
2. Do not use extension cord(s) to connect the unit
3. Do not use receptacle for connecting devices over 15A
4. Do not try to open the unit for any reason
5. Unplug all attachment plugs before closing

MOUNTING

1. Bore a 3-inch hole on the mounting surface.
2. Remove the retaining nut from the main unit. Feed the power cord through the hole.
3. Tighten the retaining nut by turning it clockwise from the bottom of the unit.
4. Plug Ethernet cord to the bottom RJ45 jack of the unit (for applicable models only).
5. Plug power cord to a nearest wall outlet. Make sure the wall outlet is properly grounded.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Please contact with National Lighting Corp. at (562) 921-0056 for assistance if any question occurs during installation.
